Jenius
United States/Canada

Dear Jenius,

As an analytical leader with a background in all facets of data analytics, project management, dashboard development, and machine learning, it is with great excitement that I submit my resume for consideration to become a member of your team. My history of hands-on experience makes me an excellent match for the unique demands of the Fraud Data Analyst position at Jenius.

In my recent position as Data Science Manager at Uber, I led a high-performing team to deliver actionable insights supporting the company's safety initiatives. By executing major fraud prevention projects, we significantly improved platform safety and user experience. Here, I also managed cross-functional projects, developed key metrics, and presented findings to executive leadership. Additionally, I played a key role in reallocating team resources to focus on high-impact initiatives, increasing operational efficiency by over 30%.

With a background in data science and business analysis, a track record of leading high-impact projects, and a deep proficiency in tools such as BigQuery, SQL, Python, and Tableau, I am well-equipped to drive strategic, data-driven decision-making. My experience managing data science teams, enhancing operational performance through insightful analysis, and implementing process improvements makes me a strong fit for this role. Please review the following examples from my resume, which outline the many strengths I can leverage to advance your mission.

- Expanded team capabilities from a business intelligence focus to a comprehensive data science scope, driving strategic transformation and enhancing data-driven product development.

- Designed and implemented an identity verification scorecard by collaborating with key stakeholders, aligning with strategic goals, and building metrics and measurement frameworks from the ground up.

- Enhanced safety initiatives for agent-facing teams at Uber by developing and conducting rigorous experimentation (A/B tests, difference-in-difference analyses) that provided actionable insights, increasing accuracy and effectiveness in safety-related decisions.

My resume provides further detail on my versatile expertise; it is my goal to apply these skills in a way that can greatly enhance your company. I look forward to setting up a meeting to discuss in greater detail how I can benefit your organization. In the interim, thank you for reviewing this letter and the attached material.

Sincerely,

Jeff Anglin
